Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 6 is rejected under 35 U.S.C. 102(e) as being unpatentable by ***Shih (US Pat. Pub. 2004/0189559)***.

Regarding claim 6, ***Shih*** discloses (Page 2, [0026-0027]) a method and system for testing driver circuits of AMOLED comprising: a pixel selection device [23] for selecting one of the driver circuits [11]; a signal extractor and analyzer [102] for retrieving a signal, storing and analyzing the signal to determine the functionality of said one of the driver circuits [11].

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, taken alone or in combination, fails to disclose a test fixture for testing an electronic device comprising: a method for testing a plurality of driver circuits on an array glass of an active matrix organic light emitting display (AMOLED) before organic light emitting diodes are implanted, each of the driver circuits including: a scan line, a

data line, a power line, a first transistor, a second transistor and a first capacitor; the method comprising the steps of: (a) repeating the steps (b)-(e) until a first signal and a second signal outputted from each of the driver circuits are retrieved; (b) enabling one of the driver circuits via the scan line; (c) charging the first capacitor and retrieving the first signal from the data line when the first capacitor is discharged via the first transistor; (d) disposing a conductive board above the array glass to form a second capacitor between the conductive board and the array glass; (e) charging the second capacitor and retrieving the second signal from the power line when the second capacitor is discharged via the second transistor; and (f) analyzing the first and second signals to determine the functionality of said one of the driver circuits (claim 1), in combination with the rest of the claims.

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Velez whose telephone number is (571) 272-8597. The examiner can normally be reached on 8:00am- 4:30pm.
